

VCODEC-H264

AMP Product Notice

PRODUCT NOTICE 1

Product Obsolescence

Issue date	1 st January, 2011	Distribution	General
PCB version	ALL	Schematic version	ALL
SDK version	ALL	Product variant	ALL

Background

Due to the unforeseen obsolescence of a key component, the VCODEC-H264 has been withdrawn from production and is now obsolete. A limited number of boards are available from stock. On this occasion, we are unable to provide our commitment to the long term supply and cannot produce any further product when our stock has been sold. We sincerely apologize for this and hope we can accommodate your project requirements with an alternative product. We would recommend the VCODEC-H264-D4 as a possible alternative.

Please contact us if you need to discuss the compatibility with the features on the VCODEC-H264-D4.

A: Contacting AMP

Sales

AMP's sales team is always available to assist you in choosing the board that best meets your requirements. Contact your local sales office or hotline.
